Full Size GlideOn LT Luxury Tourer & Compact Rambler - PopTop Truck Campers - Australian Made for Australian Conditions -

If you've been waiting for something really special in a Truck camper, well now it's here in the Escape RV GlideOn LT Luxury Tourer or the Compact Rambler. Designed and built by Escape Motorhome Conversions, you know it's built with years of experience in the Motorhome, RV, 5th wheeler and Camper industry.

EscapeRV GlideOn Pop-Top Truck Campers are constructed from 27mm fibre-glass polyurethane insulated panels with aluminium studs. When opened to full height the insulated pop top room is almost 2100mm, with six large zippered and screened windows - two on each side and one at each end.

A Hieki Mini Skylite is located over the east-west Queen Bed with two reading lights in the Lupton Nose and a window head and foot.
There is loads of space - you can even sleep with the roof down - and with it up, you have loads of extra headroom and can sit up in bed to read.

Entry is at the rear via folding steps with assist handle through a full room height triple lock integral fly screen door. The cabinetry is stunning - Escape's own design - Clean sleek lines, Apartment style, with Classy Aluminium surrounds.

Although the EscapeRV GlideOns aren't custom built - you do have plenty of decor choice for fabrics, laminates, ply and vinyl flooring options from our catalogue to personalise your living environment.

The lounge/dining area has a large swivel dining table along the left side under a large full length window. Bench seating with storage under extends across the front housing the 70L water tank, Flowjet pump and 100AH battery.
The comfortable, upholstered bench seating doubles as a step to the bed, the Wardrobe is on the righthand side with a large shelf and a cupboard over.

The kitchen is the full length of the right side, comprising a stylish 3-burner stove top and a stainless steel sink, both with tinted glass splashback lids, a 104L - 3 way fridge, microwave, vented rangehood and reversable PolaAire fan roof hatch are featured in the centre of the living area.
There are ample 240v outlets provided both inside and out.

To the left of the entry door there is the full height shower with door, flick mixer tapware, light, vented roof hatch, and optional cassette toilet.
A Stove / Oven, DVD / FM Radio, 12v DC power and a swivel mounted LCD TV and Antenna are available as options.

All materials are carefully selected for durability, look and ease of cleaning. With large windows in the living area you not only get great views but very efficient cross ventilation - even more so when the pop top windows are opened. Our GlideOns have ample storage space - just where you need it.

Probably the biggest standout features of the EscapeRV GlideOns is the strength and thermal properties in the overall construction of the body and the quality interior, both are exceptional and probably the best on the market. With the huge pop top, you get all the space without a extra height penalty when travelling or when in your carport.

When travelling the EscapeRV GlideOns are locked down to your tray with four adjustable anchor points against rubber bump protection strips. Concertina folding steps are included for easy access when touring.

When camping or at home you can easily remove and lower your GlideOn with the four corner jacks, a cordless drill or manual crank handle will allow you to place the floor height anywhere from 300mm to 1200mm allowing walk-in access from ground level - or if using your GlideOn LT as an extra guest suite at home you can easily set it up to walk straight inside from your deck or patio level. Remote controlled electric jacks are also available.

All in all, the Escape GlideOns are a great choice for roomy, comfortable accommodation with multiple use options. Ask us about how EscapeRV can build your GlideOn LT or Compact Rambler to suit your needs and to match your vehicle.
Both models are ideally suited to fit a Standard Tray (2440x1840mm)
